New Complete Office Furniture Systems

A01 and A02 complete office furniture systems are designed to stand alone, be interchangeable with, or work in tandem with Herman Miller® Action Office® Series 1 and 2. What makes them different is they are produced by Compatico, a company whose commitment to customer service is unsurpassed in the office furniture industry.

Service that's More Than a Department

Customer Service isn't a department at Compatico. It is a principle that is at the core of everything we do for our customers. You'll benefit from this philosophy when your order is specified, priced, ordered, financed, and shipped. Our people work to solve your office system challenges as if they were their own.

customer first
service

Affordable Alternatives to OEM Systems

Compatico A01 and A02's straightforward design and durable construction make them one of the best values on the market today. They are UL listed and backed by a 10-year warranty like OEM systems, yet they are lower priced.

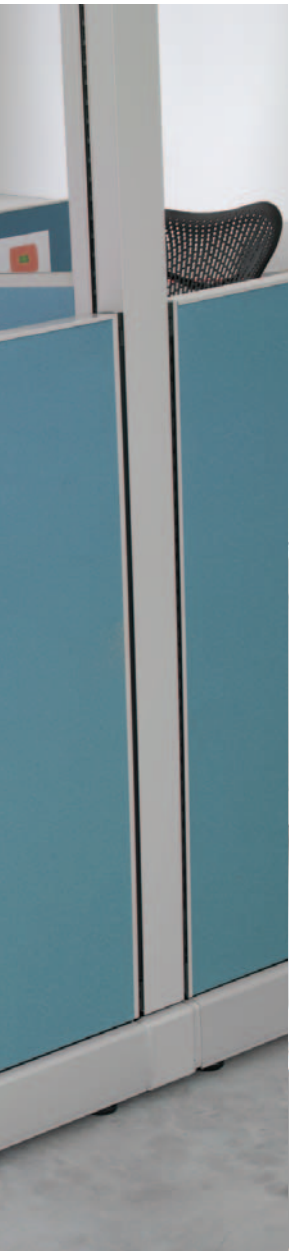

Smaller Size, Better Service

Our superior customer service is a direct result of our size. A condensed hierarchy and streamlined staff give you complete access to the people working on your behalf. We're able to make decisions more quickly, respond more quickly, and deliver a quality product in less time.

Simple, But Not Limited

A01 and A02 are simple, yet not limited. They can be configured to create a work space for any employee, and are available in an array of colors and finishes. There are also slight differences between the two lines. A02 is an enhanced version of A01 with detail upgrades and a slightly softer look. Each has its own distinctive wire management base, electrical system, edge detail, and flipper door style.

customer first
service

Empowered People Who Perform

Our simplified structure leads to greater empowerment of our people, so they are more motivated to perform at the highest level for our customers. Because our employees feel greater ownership for their area of responsibility, they also stay with us longer, raising the level of knowledge and expertise you'll receive when you specify A01 or A02 by Compatico.

Multiple Panel Options

A01 and A02 panels come in 7 standard and 3 optional paint finishes that match or are compatible with Herman Miller® colors. They can be ordered with a painted hard surface, fabric covered hard surface, tackable or acoustical, open or glazed frames, and door panels with or without side lights. Acrylic choices include frosted, clear, and smoked, in full, partial or half glazed panels.

customer first service

A Wide Selection of Worksurfaces

A01 and A02 worksurfaces have many different laminate colors and wood grain finishes, as well as 7 edge colors. A01 comes with a T-edge trim and A02 is finished with 3 millimeter edge banding. Surface shapes include rectilinear, curvilinear, peninsula, round, or racetrack. 180° or 90° spanners and straight or curved counter caps can also be incorporated into your A01 or A02 furniture system.

Quality Vendors Add to Quality Service

The longevity and expertise of our staff cultivates strong and lasting relationships with our vendors. Solid alliances with suppliers allow us to overcome obstacles more quickly, solve problems more effectively, and negotiate greater cost savings for you.

Paper management is designed to create added workspace for the office environment. Paper trays and sorter trays, and binder, CD, and pencil holders create a more efficient workspace.

Spanner work surfaces that join two workstations allow for interaction and collaboration with co-workers. Special shapes and sizes can be made upon request.

A02 wire management is 5" high, creating room for power and virtually all cabling requirements. Available in Dark Tone, Medium Tone or Innertone Light.

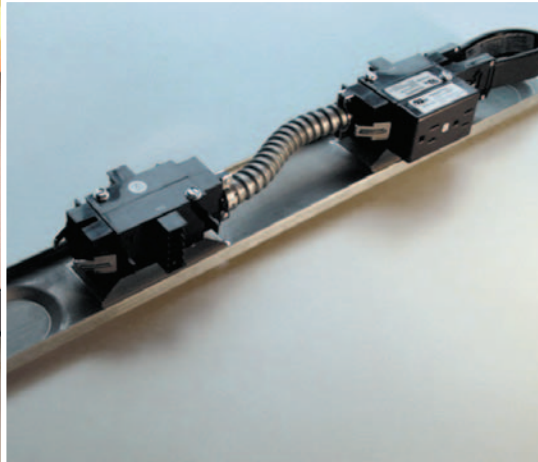

A01 wire management is 3" high and comes standard in Dark Tone or Medium Tone.

Work surface edge details are available in a durable, vinyl T-mold on A01 radius edge work surfaces. A02 style work surfaces have a square edge with a 3mm PVC edge band.

Partial glazed panels are available with clear, smoked or frosted acrylic. Panel connectors are variable height punched for all standard 34", 42", 48", 62" and 80" heights.

A Full Range of Storage Options

A01 and A02 furniture systems provide a full range of storage options. Pedestals come in 10 paint finishes and can be keyed alike. Select matching lateral files, file centers, bookcases, or two-door storage cabinets. Storage and pedestal towers with combination file storage, bookcase, and closet space are also available.

Tower storage cabinets are a new A01/A02 option. They are available in a variety of configurations including a wardrobe with cabinet/box/box/file, bookcases, and 2-door storage cabinets. Radius and square edges with corresponding pulls offer you the style that fits your workspace. The LL Series lock allows you to key alike with other Compatico components.

Rod and block panel connections allow for easy and efficient installation. In-line connectors provide a clean, visually pleasing appearance.

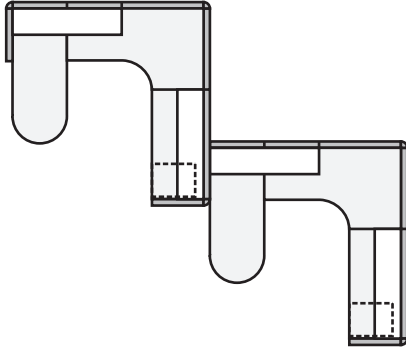

Compatico A01 electric is a 3-circuit/6-wire system that features OEM compatible power entry, festoons, electrical harness, and receptacles. A02 electric features a 4-circuit/8-wire system that allows for an isolated, dedicated circuit.

Overhead storage units can be fabric covered or metal. A01 features fabric covered door fronts with radius corners and a flat edge. A02 fabric covered fronts have squared corners with beveled top and bottom edges. The LL Series lock allows you to key alike with other Compatico components.

Pedestals are available in 10 standard colors. They are configured with box/file, box/box/file, or file/file, and can be work surface supporting, freestanding or mobile.
