OPS2
Signature
Series

A modern office workstation is shown in a bright, airy setting. The desk is white and features a black office chair with a five-point base and casters. On the desk, there is a white mug on a saucer, a printer, and a small container of pens. The background consists of a light-colored wall with horizontal wood grain and a window on the right side. A large, semi-transparent red circle with a white border is centered over the desk area, containing the text "Nice to meet you! Let us introduce ourselves...".

Nice to meet you!
Let us introduce
ourselves...

Our Story

Based in Richmond, Virginia, Open Plan Systems traditionally has been known for our green solution-remanufacturing systems furniture to provide a high-quality, low-cost, and environmentally-friendly source for modular furniture. In addition to our green efforts, we also offer an all new line of office furniture, our OPS2 Signature Series. It is made to major manufacturer standards with the added benefits of flexibility and selection, all at a significant cost-savings.

With more than 30 years of office furniture industry experience, Open Plan Systems has become an industry leader for value priced, new and remanufactured office furniture with dealers carrying our product lines throughout the country. Open Plan Systems is also a leading distributor of seating, case goods, and storage, and has developed the innovative tile system, desking system and modular walls.

Our Facility

Our 10-acre complex includes 150,000 square feet of manufacturing, shipping and administration buildings. Just 2 miles away is our 150,000 square foot facility used for receiving, production prep, and our new 5 day Lightning Program storage and showroom. We have invested more than \$4 million in our state-of-the-art manufacturing facility and \$5 million in inventory, allowing us to offer consistent and efficient turnaround times, some as short as 5 days from receipt of order.

Sustainability is the core of the remanufacturing process. Sustainable practices, including reuse of specific components and recycling initiatives, add even more value to our product lines, and reduce our impact on the environment.

UL-Approved

We take an active interest in the safety of your workplace. Every fabric we use is class A fire rated and our new and remanufactured products are approved by Underwriters Laboratories Incorporated. Many insurance policies have clauses limiting the insurance company's liability in the case of a claim due to the failure of a non-UL-listed device.

Protect your investments by making sure the product you buy is UL, BIFMA and NEC-approved.

Not too shabby, eh?

“Benefits of flexibility and selection, all at a significant cost-savings.”

SWaM

Through the Virginia Department of Minority Business Enterprise, Open Plan Systems is certified as a small, woman-owned business.

Our Green Solution

Though Open Plan Systems has become a leader in manufacturing new systems furniture, we are proud of our roots in remanufacturing. Remanufactured stations typically provide up to 40% savings off the cost of new, though they are held to the same standards of quality and durability. If you are looking for a green solution for your office, or simply need to maintain a lean budget, our Sustainability Programs are a great fit!

Warranty

All of our new and remanufactured system products are covered by a lifetime warranty for the original purchaser. Our Elevation Series seating are covered by a lifetime warranty on components for the original purchaser. Our Value Series seating are covered by a 10-year warranty on components and a 5-year warranty on foam/textiles for the original purchaser. Our case goods are covered by a 10-year warranty for the original purchaser from defects in material and workmanship. See our Warranty Statement for additional details.

OPS2 Signature Series

Overview

Our OPS2 Signature Series features new U.S. product made to major manufacturer standards. Enjoy the ability to modify your stations with benching options, glass and fabric mullions and stackers.

Our Signature Series also offers our largest selection of fabrics and finishes so that you can be assured your office is customized to fit your specific work environment!

Within the Signature Series, we utilize an aluminum top cap and one-piece rail where the slot channel and trim color are the same. In addition to styling, the one-piece rail is beneficial when connecting panels of different heights in a straight line. The 4-circuit power utilized has the outlets indexed to the middle of each panel, allowing for two duplex receptacles on each side of 24"-60" panel. Attached to the power harness are the jumpers for power continuation from panel to panel and panel through connector.

Included under the OPS2 Signature Series are the following lines: Panels, Tiles, Desking and Modular Walls.

Tiles

As the work place continues to evolve, so should your work space!
Our OPS2 Tile System give you the flexibility and adaptability to create your desired business setting of today and affordably evolve with the future.

Employing the original open-plan concept, create a designer look at a budget price with the all new OPS2 Tile System. This product is exclusive with our Signature Series and is fully compatible with existing workstations and accessories of the originating manufacturer. This design is engineered to save space and adapt by using interchangeable components. We have developed a true tile system to integrate with our OPS2 Panel System. True stacking along with glass, open frame tiles, fabric tackable acoustic, laminate and perforated tiles.

Our OPS2 Tile System is truly a guaranteed investment!

Tile Heights	Tile Widths	Tile Frame Heights	Tile Stacker Heights	Add Tile Stacker to Achieve
7"	24"			
14"	30"	39"	8"	47" H
18"†	36"	53"	14"	85" H
	42"	67"	18"†	103" H
	48"			

† 18" H can be used as bottom tile or 18" stacker only.

Our OPS2 Tile System is truly a **guaranteed** investment!

“Designers will enjoy the **flexibility** and **variety** of the OPS2 Panel System...”

Panels

Give your office an updated feel. Designers will enjoy the flexibility and variety of the OPS2 Panel System, which has the largest selection of fabrics and finishes among our systems programs. With the number of options available, Open Plan has just what you need for any project.

Desking System

Breaking Down the Walls

Our metal desking system offers more options and flexibility in the work place. With the variety of low storage options, paired with coordinating legs and overhead choices, this system proves exceptionally functional and can be easily integrated into any environment.

The many configurations allow a personalized work station that can suit any application - private, semi-private, open plan, benching and so much more! The practical functions and low cost offering of our desking truly create a value added option for all businesses.

Less IS More

With the smaller scale of our desking system and added low storage options, the possibilities are practically endless on creating a functional and efficient workspace. The variety of finish selections, clean design and layout options provide a more contemporary look for any office environment.

“...the possibilities
are **practically**
endless...”

Our metal desking system comes standard with a full pull and square legs. Low Storage comes standard with a metal top and wire management. An optional laminate or cushion top is also available.

Offered in BU, HF, MT and WF paints. An optional laminate top is available in all 16 Signature finishes.

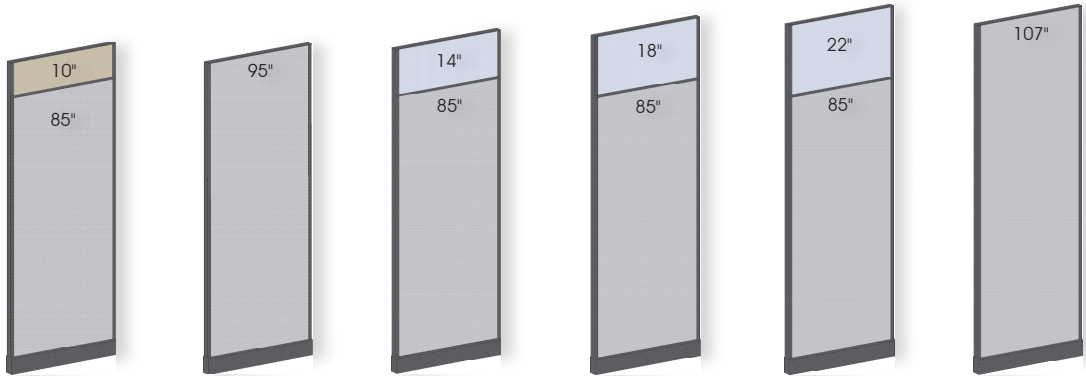

Modular Walls

Refine Your Space.

In a collaborative work environment, modular walls allow for the open plan concept paired with the management of noise and distractions. Create a new conference room or private office at a fraction of the cost of alternative solutions. Add space to existing buildings with new floor to ceiling modular walls and doors that accommodate

ceilings up to 9 feet high. The optional ceiling channel trim adds the finishing touch to floor-to-ceiling modular walls. With finish offerings of fabric, acoustic and laminate panels, we are confident you will be satisfied with the quality and value of our modular walls. UL Listed with a Class A Fire Rating.
